What is this product?

TYPE

This product is a Public Debt Short-Term money market fund under the Money Market Fund Regulation (MMFR) and a sub-fund of BNY Mellon Liquidity Funds plc an open-ended umbrella type investment company with variable capital, organised as an Undertakings for Collective Investment in Transferable Securities (UCITS).

OBJECTIVES

Investment objective

To provide investors with as high a level of current income in U.S. Dollar terms as is consistent with the preservation of capital in U.S. Dollar terms and the maintenance of liquidity.

Investment policies

- The Fund will invest in securities issued by the U.S. Government (and where both the original sum invested and interest payments are guaranteed by the U.S. Government) including U.S. Treasury bills, bonds and notes. The Fund will also enter into reverse repurchase agreements (transactions which generate returns by lending cash in exchange for debt securities with certain eligible counterparties on a short-term basis).
- The Fund will maintain a weighted average maturity (WAM) of no more than 60 days or such shorter period as may be required to obtain the highest rating of a recognised rating agency. WAM is used to measure the Fund's sensitivity to changing interest rates. For a security which pays a fixed rate of interest, WAM is the length of time until the Fund's investments are due for repayment and for a security which pays a floating rate of interest, it is the time remaining until the next interest rate reset. These figures are combined and adjusted to reflect the proportion in which each security is held.
- The Fund will also maintain a weighted average life (WAL) of no more than 120 days or shorter period as may be required to obtain the highest rating of a recognised rating agency. WAL is the average remaining time to maturity of each of the Fund's investments (adjusted to reflect the proportion in which each security is held).
- At least 10% of the Fund's assets shall be comprised of daily maturing assets, reverse repurchase agreements which are able to be terminated by giving prior notice of one working day or cash which is able to be withdrawn by giving prior notice of one working day.
- At least 30% of the Fund's assets shall be comprised of weekly maturing assets, reverse repurchase agreements which are able to be terminated by giving prior notice of five working days or cash which is able to be withdrawn by giving prior notice of five working days.
- The Fund finances and aims to maintain an AAA Fund credit rating from Standard & Poor's or an equivalent rating given by an

internationally recognised rating service. Securities invested in will be high quality as rated by leading rating agencies and will be liquid i.e. easily converted into cash.

- The Fund is authorised as a "Public Debt Constant Net Asset Value (NAV) Short Term Money Market Fund".

Benchmark

The Fund is actively managed and is not managed with reference to a benchmark.

Redemption and Dealing: you can buy and sell your shares in the Fund on each business day on which the New York Stock Exchange and US banks are open. Initial instructions received before 12:00 (New York time) or such other time as the Directors may from time to time determine and subsequent instructions before 17:00 (New York time) or such other time as the Directors may from time to time determine will receive the price quoted on that day. The minimum initial investment for this share class is USD 5,000,000.

Distribution Policy: This share class is a distributing share class which seeks to maintain a stable Net Asset Value (NAV) per share. This means dividends will be declared daily and will be paid to shareholders monthly where the net return of the Fund (i.e. the return less fees and expenses) is positive.

PRODUCT TERM

This product does not have a maturity date. The board of BNY Mellon Liquidity Funds plc may terminate the Fund unilaterally in accordance with the fund documentation. In addition, your investment may be terminated unilaterally where you no longer comply with the conditions set out in the fund documentation including minimum holding requirements.

What are the risks and what could I get in return?

RISKS

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 1 out of 7, which is the lowest risk class.

This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact the capacity of BNY Mellon Fund Management (Luxembourg) S.A. to pay you.

Be aware of currency risk. Where the share class is denominated in a different currency to that of your home jurisdiction, you will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at www.bny.com.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between December 2014 and December 2015.

Moderate: this type of scenario occurred for an investment between March 2017 and March 2018.

Favourable: this type of scenario occurred for an investment between August 2023 and August 2024.

Where insufficient fund performance history exists, an appropriate benchmark has been used as a proxy.

What happens if BNY Mellon Fund Management (Luxembourg) S.A. is unable to pay out?

Investors are unlikely to face a financial loss should BNY Mellon Fund Management (Luxembourg) S.A. fail or default. While BNY Mellon Fund Management (Luxembourg) S.A. is responsible for management and administration of the Fund, it does not hold the assets of the Fund, including monies payable to investors. The Depositary is responsible for the safekeeping of the assets of the Fund. Investors may suffer loss, up to the value of their entire investment, if the Fund or the Depositary is unable to pay out. BNY Mellon Fund Management (Luxembourg) S.A. has no obligation to pay out in this scenario and there is no applicable investor compensation scheme to cover any loss in such an event.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,

■ \$ 10,000 is invested.

	if you exit after 1 year (recommended holding period)
Example Investment \$ 10,000	
Total Costs	\$ 26
Annual cost impact*	0.3%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.1% before costs and 0.8% after costs.

How long should I hold it and can I take money out early?

Recommended holding period: 1 years

The above-mentioned period has been recommended as a result of the product being a money market fund with daily liquidity and on the basis of the fund's risk and reward profile. Your ideal holding period may be different from this recommended holding period. We recommend that you discuss this with your advisor. If the holding period is shorter than the recommended holding period, this may have a negative impact on the return on your investment. Any costs are shown under "Composition of costs" above. Information about how to buy and sell shares in the Fund can be found in the Fund's supplement.
